

Beamex Care Plan

The easy way to protect your investment

Hassle-free coverage for your equipment, peace of mind for you

To maintain metrological traceability in your operations, your calibration equipment itself needs to be periodically calibrated. A Beamex Care Plan takes care of this for you, allowing you to focus on your core business.

Properly working and well-maintained calibration equipment is critical to keep your operations up and running. But accidents do happen, and damaged or faulty equipment is a hassle you can do without in your already busy schedule. With a Beamex Care Plan we've got you covered, with the peace of mind that comes with free repairs, even in case of accidental damage.

> *When I purchased the Beamex Care Plan, I never dreamed I'd actually ever use it other than for recertification of our calibrators. After all, I've used Beamex calibrators for 20 years and it's all I've ever had to do to them. But sooner or later accidents do happen, and I was never more glad that I had the plan."*

Peter Langlais
IC&E Technician
Rhodes Technologies

A calibrator is typically an investment with a long operating life, but it becomes useless if not kept accurate and traceable with regular maintenance. Repairs for any accidental damage can also be expensive and time consuming.

A Beamex Care Plan is a contract for the calibration and maintenance of Beamex equipment. It ensures that your Beamex calibrators remain accurate and operating optimally throughout their life cycle, while managing the equipment lifecycle costs.

Why choose a Beamex Care Plan?

- Periodic accredited calibrations ensures that your calibrators remain accurate and traceable throughout their life cycle
- Free repairs, even in case of accidental damage, keep your calibrators in working order at all times
- Fixed maintenance costs mean cost predictability and no unpleasant surprises

What's included?

- Flexible calibration intervals – 3, 6, 12 or 24 months
- Regular accredited calibrations
- Free shipments to and from the Beamex calibration laboratory
- Free repairs, even in case of accidental damage
- Replacement of wearable parts
- Email reminder when calibration is due
- Updates to firmware, device description files, and other relevant elements
- Free helpdesk services
- Priority service with expedited turnaround times

For a detailed description of what's included, please read the Beamex Care Plan terms and conditions. Please contact Beamex for more information and a quotation.
