F2 CHEMICALS LTD

THE COMPANY

F2 Chemicals manufacture specialist performance perfluorinated fluids which can be used in a wide range of industries including oil and gas, semiconductor manufacture, cosmetics, medical applications and more.

THE CHALLENGE

With so many assets to calibrate on the plant and with just one calibrator we struggled to get this done efficiently. To get the job done we needed several calibrators.

THE SOLUTION

Beamex MC6-Ex Intrinsically Safe Field Calibrator
Beamex FB660 Field Temperature Block Calibrator
CMX Calibration Management Software

THE BENEFITS

With the Beamex MC6-Ex and FB660 Temperature Calibrators we were able to handle and automate all our temperature calibrations and produce our calibration certificates which allowed us to save a large amount of time and become more efficient.
