

CUSTOMER TESTIMONIAL

beamex

Sterling

THE COMPANY

Sterling Pharma Solutions provides API manufacturing to leading pharmaceutical and biotechnology organisations and offers support to customers for a wide range of temperatures, pressures, vacuums and other technical demands.

THE CHALLENGE

Being in a highly regulated industry with strict safety guidelines we have an increasing demand for traceable calibrations, scheduling and reporting. All of our calibration data must be safely stored and easily accessible for audits.

THE SOLUTION

Beamex MC6-Ex Intrinsically Safe Field Calibrator
Beamex MC5-IS Multifunction Calibrator
CMX Calibration Management Software

THE BENEFITS

With the Beamex MC6-Ex and CMX Software we have been able to successfully comply with the customer and regulatory audits regarding our instrument calibrations. All of our calibration data is stored in a database where reports can be produced automatically, calibration certificates can be printed and we can ensure data integrity. We have been praised for the data presented, viewed and reported on both internally and externally to FDA level.
